Re: Sight Distance
Trinity Conservation Gravel Pit
Map 210 Lot 57
Barrington, NH

Intersection Sight Distance was measured in field from the proposed driveway location at Green Hill Road. The posted speed limit on Green Hill Road is 30MPH. Sight distance was measured from a point 15 feet off the edge of existing pavement. The height of the object was 3'9" and the height of the driver's eye was 3'9". The entire sight line was over the existing roadway surface of Green Hill Road. Sight distance was measured at 335 feet looking left (west) and 285 feet looking right (east) from the driveway.

TFM will prepare a sight line plan and profile prior to final approval for submission to the Town of Barrington.
