RE: Project Narrative
Carbaugh Subdivision, Second Crown Point Road

Dear Chairman & Board Members:

Joseph and Virginia Carbaugh are proposing a back-lot subdivision of their property at 282 Second Crown Point Road, Barrington, NH. The 10.52 acre parcel is currently known as Tax Map 203, Lot 7 and includes land on both sides of the Berry River.

The proposed subdivision would divide a 4.19 acre building lot on the back side of the Berry River and driveway access would be from Second Crown Point Road on the very southeasterly corner of the property. Although the back-lot subdivision is slated to have 50 feet of frontage on the Class 5 road, the terrain is very steep and there are historical stonewalls adjacent to Second Crown Point Road. There is a 10 foot drop from a natural ridgeline down to the roadway within a 30 foot distance, or 33% slope. Although a driveway could be physically constructed in this location, it would be extremely disruptive to the slope and adjacent stonewalls. The driveway would also be within 40 feet of the guard rails that protect the travelled way for the major culvert which traverses the Berry River.

A reasonable alternative to placing the driveway within the proposed frontage would be the utilization of the abutting driveway / right-of-way. The driveway is currently being used by the owners of Lot 8, Tax Map 203, and Lot 76, Tax Map 101, both currently owned by a trust for Scott and Darlene Doughty. Mr. Carbaugh has also been using the driveway for logging and firewood access to the property by permission. The trustees of Tax Map 101, Lot 76 are willing to provide an easement for the expanded use of this driveway.

The proposed 12' wide driveway would traverse the ridge between the slopes to Berry River and wetlands adjacent to the property line.

PART IV – If this is a JUSTIFICATION FOR VARIANCE

The Zoning Board of Adjustment may not authorize a zoning ordinance variation unless ALL of the following criteria are met. Please provide evidence that the requested Variance complies by addressing the issues below.

- ☐ 1. Special conditions exist such that literal enforcement of the Ordinance will result in unnecessary hardship to the applicant as defined under applicable law.

- ☐ 2. Granting the variance would be consistent with the spirit of the Ordinance.

- ☐ 3. Granting the variance will not result in diminution of surrounding property values.

- ☐ 4. Granting of the variance would do substantial justice.

- ☐ 5. Granting of the variance would not be contrary to the public interest.

PART V – If this is a JUSTIFICATION FOR SPECIAL EXCEPTION

Please provide evidence that the requested Special Exemption complies by addressing the issues below.

- ☐ 1. No detriment to property values in the vicinity of the proposed development will result on account of: the location or scale of buildings, structures, parking areas, or other access ways; the emission of odors, smoke, gas, dust, noise, glare, heat, vibration, or other pollutants; or unsightly outdoor storage of equipment, vehicles, or other materials.
Abutting land owners agree to access for the proposed lot over an existing access easement that is providing driveway access for
lots. The additional lot access from this driveway will not violate this provision.

- ☐ 2. No hazard will be caused to the public or adjacent property on account of potential fire, explosion, or release of toxic materials.

The driveway is an existing driveway and woods road onto Second Crown Point Road and no hazard will be caused.

- ☐ 3. No creation of a traffic safety hazard or substantial traffic congestion will result in the vicinity of the proposed development.

LAND USE OFFICE

MAR 24 2014

RECEIVED

The proposed access is over an existing driveway and no traffic safety hazard will be created.

☐ 4. No excessive demand on municipal services and facilities, including, but not limited to waste disposal, police and fire protection, and schools.
The proposed access will not change municipal services.

☐ 5. The proposed use will not result in the degradation of existing surface and groundwater quality standards, nor will it have adverse effects on the natural functions of wetlands on the site that would result in the loss of significant habitat or flood control protection.
The proposed access is set back from wetlands and the Berry River further than a driveway by right would allow.

In addition to the guiding principles specified above, the ZBA may condition the granting of a special exception upon more stringent standards if the Board determines that such conditions are necessary to protect the health and welfare of the town and its residents. Such conditions may include the following and should be addressed in the Narrative:

- ☐ 1. Front, side, or rear yards in excess of the minimum requirements of this Ordinance.
- ☐ 2. Screening of the premises from the street or adjacent property by walls, fences, or other devices.
- ☐ 3. Limitations on the size of buildings and other structures more stringent than minimum or maximum requirements of this Ordinance.
- ☐ 4. Limitations on the number of occupants and methods and times of operation.
- ☐ 5. Regulation of the design and location of access drives, sidewalks, and other traffic features.
- ☐ 6. Location and amount of parking and loading spaces in excess of existing standards.
- ☐ 7. Regulation of the number, size, and lighting of signs in excess of existing standards.
