SECTION 9.6 APPLICATION FOR SPECIAL PERMIT FOR CONSTRUCTION IN WETLAND BUFFER

TOWN OF BARRINGTON

PO Box 660; 333 Calef Highway

Barrington, New Hampshire 03825

A SPECIAL USE PERMIT allows the Town of Barrington to consider special uses which may be essential or desirable to a particular community, but which are not allowed as a matter of right within a wetlands buffer in the Wetlands Protection District Overlay, but rather only by a special use permit. A public hearing is required.

Is the proposed use permitted by right in the appropriate base zoning district? (See Table 1, Table of Uses, located in the town zoning ordinance)

-If yes, then proceed with the below criteria for a Special Use Permit pursuant to Section 9.6.

-If, on the other hand, the proposed use requires a conditional use permit, a special exception, or a variance, you must obtain that permit or approval before seeking a Special Use Permit pursuant to Section 9.6.

This application applies only to uses proposed in the Wetlands Protection District Overlay that violate the required wetland buffer. There is a separate application for a Conditional Use Permit pursuant to Section 3.4, which is also available in the town Land Use Office.

Is the proposed use related to a Site Plan or Subdivision Application? Yes _____ No _____

Describe in detail all existing uses and structures on the subject property (You may attach a separate typed sheet):

VACANT LOT APPROVED FOR A SINGLE FAMILY DWELLING.

Size of Impact NONE.

Describe in detail all proposed uses, structures, construction, or modifications requiring a Special Use Permit.

IN ORDER TO CONSTRUCT A DRIVEWAY FOR THE PROPOSED SINGLE FAMILY DWELLING, THE DRIVEWAY MUST ENCRACH UPON THE WETLAND BUFFER. THE ATTACHED PLAN SHOWS THAT THE PROPOSED DRIVEWAY ENCRACHES ON THE WETLAND BUFFER ONLY WHERE NECESSARY, IN ORDER TO ACESS THE GARAGE.

Describe in detail how the following standards of the Town of Barrington Zoning Ordinance under Section 9.6 "Special Permit for Construction in a Wetlands Buffer" have been satisfied by your proposal. (You may attach a separate sheet.)

1. The proposed use is in keeping with the intent and purposes set forth in the zoning ordinance as permitted in the base zoning district (See Table 1, Table of Uses, located in the zoning ordinance). If the base zoning district requires a conditional use permit or special exception for the proposed use, one must already have been obtained; or if the proposed use is not listed on the Table of Uses or is listed but not permitted, one must already have obtained a variance.

TABLE 1 DOES NOT INDICATE THAT A CONDITIONAL USE PERMIT OR SPECIAL EXCEPTION FOR THE PROPOSED USE IS REQUIRED.

2. After a review of all reasonable alternatives, it is determined to be infeasible to place the proposed structure or use outside of the buffer zone.

THE GRADES OF THE LOT REQUIRE THE PROPOSED DWELLING'S GARAGE AND DRIVEWAY TO BE CONSTRUCTED ON THE RIGHT SIDE OF THE LOT, IN ORDER TO MAINTAIN PROPER DRAINAGE. NO PORTION OF THE PROPOSED DWELLING IS WITHIN THE WETLAND BUFFER.

3. The proposed structure or use must be set back as far as possible from the delineated edge of the wetland or surface water.

THE PROPOSED DRIVEWAY IS SHOWN TO BE CONSTRUCTED AS FAR FROM THE WETLAND BUFFER AND DELINEATED EDGE OF THE WETLANDS AS POSSIBLE. WHEREVER POSSIBLE, PORTIONS OF THE DRIVEWAY DO NOT ENCRACH THE BUFFER.

4. Appropriate erosion control measures must be in place prior to and during construction.

ALL APPROPRIATE EROSION CONTROL MEASURES WILL BE USED PRIOR TO AND DURING CONSTRUCTION.

5. Any disturbance to the surrounding buffer zone must be repaired and restored upon completion of construction.

DISTURBANCE TO THE SURROUNDING BUFFER ZONE WILL BE REPAIRED AND RESTORED UPON COMPLETION OF CONSTRUCTION.

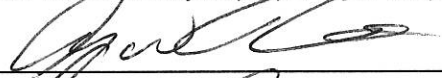

6. All available mitigation measures to address changes in water quality and quantity be implemented, along with design and construction methods to minimize adverse impacts, if required by the Planning Board.

DRIVEWAY WILL BE GRADED AND CONSTRUCTED IN ORDER TO
MINIMIZE ADVERSE IMPACTS.

Statement of Assurance and Agreement:

I hereby certify that to the best of my knowledge this submitted application information is true and correct. All proposed development will be in conformance with the information contained on the application and in the approved plan as well as the provisions of the Town of Barrington ordinances and regulations.

The Owner/Agent, by filing an application, hereby grants permission for members of the Board and staff to enter onto the subject property for the purposes of this review.

PLEASE SEE ATTACHED DESCRIPTION

Town of Barrington – Land Use Department –
Project Narrative.
9.6 – Franciosa

Tax Map: 110 / Lot: 19

Description of Project:

To construction a single family dwelling, with a footprint of 28' x 36' with a paved driveway on an approved 2.86 acre parcel located on Tax Map 110, Lot 19.

The natural elevations of the lot require the driveway to be constructed on the right side of the lot. In order to access the garage doors, certain portions of the driveway must encroach upon the 50' Wetland Buffer. The closest edge of the proposed driveway to the edge of wetlands will be 18.5'. No portion of the proposed dwelling / structure is within the Wetland Buffer. The proposed dwelling is designed as a "Garage Under", in order to keep the structure within the buildable envelope and outside of the Wetland Buffer.

The proposed driveway has been drawn (please see provided plan) in order to minimize the encroachment of the Wetland Buffer.

The turn-around section of the driveway, which encroaches on the Wetland Buffer, will have vegetation plantings in place in order to mitigate run-off and minimize adverse impacts.

Also, the Foundation Drain, which is shown on the attached plan to be within the wetland buffer, will be properly installed. Any soil / grades that are disturbed during construction will be repaired and restored upon completion. Restoration will include re-grading and re-seeding of soil in the disturbed areas.

Prior to and during construction, appropriate erosion control measures will be in place to prevent adverse impacts.
