Electric Usage Summary

This month your average daily electric use was **142.0 kWh**

This month you used **26.8% more** than at the same time last year

News For You

Beginning Aug. 1, if you receive energy supply from Eversource, you will see a decrease to your bill compared to July. The supply rate is decreasing as the cost of natural gas has come down, which is used to produce more than half of the region's electricity. The supply rate is adjusted twice a year in February and August. Energy use also increases in the summer. To maximize your savings, see how we can help you use less energy and manage your bill at Eversource.com/summer-bill.

Important Messages About Your Account

Because the billing period spans a change in the rates, your usage has been calculated partly on the old rate and partly on the new rate.

The stranded cost recovery charge is composed of a rate reduction bond charge owned by PSNH Funding LLC 3 as filed with the NHPUC and a stranded cost recovery amount approved by the NHPUC.

Eversource now offers a new residential Time-Of-Day rate, (ROTOD-2), that could save you energy and money. By managing when you use electricity in your home, you could save on your monthly electric bill. See how we can help you use energy more efficiently and lower your bill at Eversource.com/energy-savings-tips.
