2022 Paving Projects

The following is a tentative list of road paving projects for the 2022 season.

1. South Mallego is a holdover from this year because of drainage engineering that is progressing, but taking some time. If we are lucky enough to get the drainage done next year, we would be doing full depth reclamation adding crushed stone. This project also ties into a drainage issue on Lee Road which will have to be done at the same time. If this project materializes, the budget figure for this would be \$350,000 not counting any drainage work. This would be binder coat only to be overlaid the following year.
2. Oak Hill Road should be overlaid once the intersection, and drainage at Route 9 are taken care of. This would be another important piece of the puzzle in getting the roads that are used to bypass the Calef intersection fit for the traffic that they will be handling.
If this road were done, the budget cost would be \$180,000. This would not include any of the work at the route 9 intersection
3. Forest Brook/ Century Pines overlay -estimated cost of -\$40,000.
4. Cate Road overlay-estimated cost of \$51,840.
5. North Mallego overlay-estimated cost of \$72,000.
6. Sawyer Lane overlay-estimated cost of \$22,560.
7. Beauty Hill from 125 to Hall Road overlay-estimated cost of \$86,500.

8. Pond Hill from Camp Fireside to Second Crown Point overlay-estimated cost of \$46,080.
9. Partridge Lane reclaim, add stone, binder coat. -estimated cost of \$42,000.
10. Tibbets Road reclaim, add stone, binder coat-estimated cost of \$80,000.

Estimated total of all projects; \$970,980.

Respectfully,
Marc Moreau
Road Agent
