## **Barrington Highway Department Proposed Paving List For 2023**

As a result of our recently adopted pavement management plan through our Town engineers (CMA), we are proposing the following roster of roads for pavement treatment consideration for the year 2023. This would be year two of the plan. The list is as follows;

<b>Town Road</b>	<b>Pavement Treatment</b>
Boyle Lane	Shim and overlay
Coachman Drive	Shim and overlay
France Road	Shim and overlay
Hall Road	Shim and overlay
Pond Hill Road	Shim and overlay
Second Crown Point Road	Shim and overlay
Tibbets Road	Shim and overlay
Waterhouse Road	Shim and overlay
Parts of Tolend Road	Reclaim and new binder
Crack seal as needed	

Not on the list, but should be added.

1. Rebuild deteriorated sections of Ramsdell Lane, and apply binder layer in anticipation of overlay next year.

This road to me is a priority because of school bus and parent traffic. The road in its current poor shape is extremely rough on all vehicles including our plow trucks, and has become very difficult to get down to bare pavement requiring more salt. The bad sections would be gutted, under drained , and rebuilt with select materials as was done successfully on Oak Hill Road .

This list is rather fluid and several items could be replaced or deleted as funds allow.

Respectfully  
Marc Moreau  
Road Agent
