Marcia:

Attached are sketch maps of the two parking areas planned for the Southeast Land Trust's Stonehouse Forest property. I can't give you exact dimensions for each of these but the plan is to accommodate 6-12 cars at each location. Typically these range in size from 50-75 plus feet in width with a variety of shapes based on the terrain and needs. At both locations we will build them large enough to allow for cars to turn around before exiting. Gates were installed by the previous owner and those will not need to be relocated for this project. We'll use boulders to block access onto our woods road so that unwanted vehicles can't go around the gates. Other than that, each site is very dry so wetlands permits are not required. Our contractor will rough out the site by stumping, stripping off what little topsoil might be found and moving large rocks. The entrance ways will be treated at the same time. All of the area will be capped with approximately 12 inches of processed 3/4 inch gravel.

Let me know ASAP when I should meet with the board.
