

10.24.22

To the Board and Commission

I was reviewing back on the October meeting and two things came to mind. First I apologize for some of the wording in the content of our letter, in hindsight I see it didn't come out as intended. With an illness and death within our family that weekend I see it wasn't what it should have been. It was meant to be a thank you letter and a reflection of what had been observed. It wasn't a consensus of many of you but a sense of several. And it was repetitive information that isn't covered under either board.

The second item is regarding a conversation about our house not being 2 stories. I'm curious as to why in this context our home wasn't/isn't considered 2 stories?

Again I thank you for your time and energy working with issues and concerns for everyone. Viewing several meetings I can see that you are a board that does work hard at problem solving.

Sincerely,

Sue & Ray Morrison
