Hello,

I live on the other side of the lake where you are planning on building. I think it's a terrible idea to tear down those woods. Those woods are very good for the economy system set in place for Nippo lake and I think in doing so will ruin how clean the lake has been. By adding more housing so close to it will cause a lot more issues. I feel as though there are other locations in Barrington they could choose other than that particular spot. I vote a big NO on this project and hope this helps make it not happen.

Thank you,

Rachael
